Welcome message from the WEO president

It is with great pleasure that the World Endoscopy Organization welcomes you to **ENDO 2017 - the first World Congress of Gastrointestinal Endoscopy** in Hyderabad, India. It makes me so proud that my hometown will be also your “home” during the days of the event.

Throughout the planning and preparation for **ENDO 2017**, we have continuously highlighted the importance and need for a global meeting which would address the needs of both developed and developing countries in terms of digestive endoscopy. Our specialty has long surpassed its function as an examination tool and is today the mainstay not only for diagnosis but also for treatment in gastroenterology.

**ENDO 2017** will recognize these achievements and in parallel address the increasing complexity faced by endoscopists. Developing countries in particular are challenged by a shortage of training, qualified healthcare professionals and medical infrastructures. It is high time the endoscopy community is brought together to stimulate international exchange and to establish best practices. That is what makes **ENDO 2017** so important.

New research submitted from all around the world has made our program unique in format and design. The scientific program includes a full one-day postgraduate course, live demonstration sessions running from Thursday to Saturday, a comprehensive learning center and varied symposia. Topics will cover new and cutting-edge information on a broad range of topics in gastroenterology, hepatology and oncology, presented from the perspective of an endoscopist. Presentations will combine basic science and clinical practice, with a spotlight for topics relevant to the Asia-Pacific region and emerging countries.

I extend a warm welcome to all colleagues coming to Hyderabad for **ENDO 2017** – a meeting that will certainly be one of a kind. Join us in putting the future in focus.

#### Information about CME Credits

The European Accreditation Council for Continuing Medical Education (EACCME) has awarded 21 European CME Credits (ECMEC) to **ENDO 2017**.

The Telangana State Medical Council has awarded 7 CME Credits to **ENDO 2017**.

‘**ENDO 2017 - 1st World Congress of GI Endoscopy**’ is accredited by the EACCME to provide the following CME activity for medical specialists. The EACCME is an institution of the European Union of Medical Specialists (UEMS), www.uems.net.

‘**ENDO 2017 - 1st World Congress of GI Endoscopy**’ is designated for a maximum of (or ‘for up to’) 21 hours of European external CME credits. Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity. The EACCME credit system is based on 1 ECMEC per hour with a maximum of 3 ECMECs for half a day and 6 ECMECs for a full-day event.

Through an agreement between the European Union of Medical Specialists and the American Medical Association, physicians may convert EACCME credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME credits to AMA credit can be found at [www.ama-assn.org/go/internationalcme](http://www.ama-assn.org/go/internationalcme).

Live educational activities, occurring outside of Canada, recognized by the UEMS-EACCME for ECMEC credits are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of The Royal College of Physicians and Surgeons of Canada.

ENDO 2017 SESSION DESCRIPTION

Below is a short description of the structure and goals of the different sessions that constitute the Congress’ Scientific Program.

POSTGRADUATE COURSE

Sessions in the Postgraduate Course cater especially to the needs of the up-and-coming generation. Accordingly, all activities focus on the challenges faced by recent graduates. The themes are highly relevant for tomorrow’s experts, preparing them to become leaders in the field of endoscopy.

NURSES PROGRAM

A meeting for GI nurses and technicians, to be organized in collaboration with local and Asian-Pacific partners, addressing relevant topics such as sedation and patient preparation.

HONORARY LECTURES

Honorary lectures will be convened each morning after the Live Demonstrations, from Thursday to Saturday and will present the highly prestigious Named Lectureships of the World Endoscopy Organization zones: SIED (Rudolf Schindler Honorary Lecture), A-PSDE (Sadataka Tasaka Honorary Lecture) and ESGE (François Moutier Honorary Lecture). These are lectures delivered by luminaries in the field of GI Endoscopy and Gastroenterology. The seminal orations may well have an impact on our daily practice, or alternatively, point to new areas of research. These lectures are certainly a highlight of the congress.
MEET THE EXPERT BREAKFAST

Experts cover latest trends and topics in detail, in an intimate and interactive setting, allowing for open discussion among participants.

LIVE DEMONSTRATIONS

Top international experts demonstrate both basic and cutting-edge techniques. Broadcast from the Asian Institute of Gastroenterology, the Live Demonstrations at ENDO 2017 showcase the best and most instructive procedures, performed by the world’s greatest experts. Real-life viewing of endoscopic procedures is an important teaching tool. Through an audio link with the hospital, the audience can pose questions during procedures and become involved, almost as if they were performing the procedures themselves.

INDUSTRY SATELLITE SYMPOSIA

Corporate Partners are invited to sponsor luncheon or evening symposia. Each symposium is under the responsibility of the company sponsoring the session. The program of industry sponsored symposia is not affiliated with ENDO 2017.

SOCIETY SYMPOSIA

Each Scientific Supporter has the opportunity to present regional challenges and recent developments in these individual symposia which are developed as a collaboration between the society and the ENDO 2017 Scientific Committee.

GENERAL SYMPOSIA

The ENDO 2017 Scientific Committee, composed of world experts, worked closely together, to consider all aspects of endoscopy and then pruned the selection down to create a selection of the most innovative and significant themes in endoscopy today.

WEO LEARNING CENTER

The Learning Center offers different educational formats for both experts and beginners to enhance their skills. There are two separate sections: the small lecture theaters where experts cover topics in an intimate, interactive setting, and the video stations, showcasing the latest clinical cases and techniques.

POSTER PRESENTATION

A total of 591 posters will be on display at the Poster Area. The oral presentations and top thirty abstracts will be displayed throughout the congress and all others will be presented for one day each. Abstracts with videos will also be available for viewing on designated terminals. Awarded authors receive waived registration and accommodation grants.

BEST ABSTRACT/VIDEO AWARDS

Two sessions on Sunday are dedicated to presenting highly interesting original research selected from abstracts submitted to ENDO 2017.

VIDEO MARATHON

During this session short videos showing examples of new, unexpected, or exceptional cases are presented, with commentary from a panel of experts.

HANDS-ON TRAINING AREA

The WEO Hands-on Training Area is open throughout the congress. This teaching activity provides a constant opportunity for delegates to test and improve their skills. WEO, under the direction of Dong-Wan Seo has joined forces with cooperating societies to provide top teaching with state-of-the-art models and simulators. Alongside the WEO sessions, the area will also feature independent sessions from our corporate partners. Don’t miss it!

DISCUSSION
Hands-on training is offered to all delegates throughout the congress. In cooperation with supporting societies and industrial partners, participants have the opportunity to test their skills and experience the state-of-the-art endoscopic equipment and accessories.

The scientific program status is as at January 15, 2017. Final changes are available on the ENDO 2017 App and online at www.endo-2017.org.
WEO HANDS-ON TRAINING AREA

The WEO Hands-on Training Area is open throughout the congress. This teaching activity provides a constant opportunity for delegates to switch between the more passive learning from the big lectures to active training - implementing new techniques and using new models. The stations featured in this area include state-of-the-art models and simulators (hemostatic devices, EMR and ESD devices, and more).

Delegates are encouraged to book their preferred session. A counter is situated in the registration area for those wishing to secure training at a definite time for a specific technique. Sessions are open on a walk-in basis, however, as participation is limited, it is advisable to register. Slots are allocated on a first-come-first-served basis.

Please refer to the ENDO 2017 App for the detailed Hands-on Training Area program.

ASIAN NOVEL BIO-IMAGING & INTERVENTION GROUP

One of the highlights of first day of ENDO 2017 will be the hands-on training conducted by the Asian Novel Bio-Imaging & Intervention Group (ANBIG), with a focus on advanced therapeutic procedures including ESD and POEM. ANBIG is established as non-government organization aiming to improvement in endoscopic diagnosis and treatment of early gastrointestinal cancers through standardized training and educational programs. The ANBIG workshop in ENDO 2017 will be conducted in a similar structured training program by world renowned experts, including Prof Haruhiro Inoue, Prof Kenshi Yao, Prof Noriya Uedo, Prof Prateek Sharma, Prof Yasushi Sano, Prof Rajvinder Singh and Prof Philip Chiu. As new elements in this program, hands-on training of novel advanced therapeutic procedures including ESD and POEM will be conducted.

WORLD ENDOSCOPY ORGANIZATION/
KOREAN SOCIETY OF GASTROINTESTINAL ENDOSCOPY

This hands-on training is intended to give the participants a chance to actually insert and deploy the plastic and/or metal stent endoscopically in the dummy model. There will be five stations, including esophagus and/or pylorus stenting, colon stenting, bile duct plastic stenting, CBD metal stenting and hilar bile duct stenting (stent-in-stent and stent-by-stent). At each station there will be two experienced tutors from KSGE members to help you with the procedure. Participants will be working in small groups so everyone can fully understand the principle and tips of stenting. Be sure to sign-up ahead if you are interested in this interactive activity. By participating in this hands-on training program, participants can expect to gain in-depth understanding of plastic and/or metal stenting which is fundamental in the management of patient with both benign and malignant gastrointestinal and biliary strictures.

BOSTON SCIENTIFIC HANDS-ON SESSIONS

Boston Scientific is an Education partner for physicians across the world, aiding them in their journey to becoming experts in their chosen fields. In these sessions, we focus on the theme of experts training trainees in a simulated environment. To cater to the training needs during ENDO 2017, under the umbrella of EDUCARE Gurukul, we are running a 3 day Hands On Learning Center (February 16-18). With two sessions daily (10am-11:30am & 2pm-3:30pm) participants can learn more about topics including: Cholangioscopy for treatment of CBD stones using laser lithotripsy, biliary cannulation, gastroscopy with hemostatic clipping techniques, colonoscopy with self-expanding stent placement, endoscopic ultrasound with FNA and Cholangioscopy for the treatment of CBD strictures. To find out more and to register, please visit the website: https://endo2017bostonscientific.eventbrite.com.au

CANTEL HANDS-ON SESSIONS

Following the release of the latest WEO guidelines the following “wet lab” experiential learning sessions have been arranged. The staff will experience first-hand the latest reprocessing procedure for each of the processes involved in the reprocessing of a flexible endoscope. These include leak testing, manual cleaning, manual HLD, AER disinfection, storage and safe transportation of the endoscope.
