

# UEWG 2017 Barcelona

**EWP Surveillance after colonic neoplasia**

Barcelona, October 27<sup>th</sup>, 2017

---

## **WEO UPDATE OF EVIDENCES ABOUT SURVEILLANCE**

### **POTENTIAL PICO<sub>s</sub>**

**Carlo Senore  
CPO Piemonte**

Centro di Riferimento per l'Epidemiologia  
e la Prevenzione Oncologica in Piemonte

# POPULATION

**Average risk** subjects referred for surveillance following excision of colorectal adenomas

- Risk groups : need to be defined
- Age range?
- Screening subjects, or also symptomatic patients ?
- Type of screening ?

**Cohort of subjects at risk or attendees**

# INTERVENTION

## Colonoscopy surveillance

- **Surveillance intervals : recommended or observed?**
- **Alternative tests to be considered?**

# COMPARISON

**No surveillance**

**Different surveillance intervals : recommended or observed?**

- **Incidence**

**general / average risk population**

**subjects with positive screening test and**

**negative assessment**

**screenees with negative screening test**

# OUTCOME

**Advanced adenoma detection rate (cumulative)  
available only for those who attend the  
recommended exams**

**CRC incidence**

**CRC detected at colonoscopy surveillance  
planned interval  
any colonoscopy (interval)**

**Ascertained for the entire cohort**

# STUDY DESIGN

**Cohort studies**

**RCTs**
