

# Webinar Program

WEO CRC SC Expert Working Group:

Coalition to Reduce Inequities in Colorectal Cancer Screening

---

**Friday, November 20, 2020 – 5.00 pm (GMT, London)**

**Corresponding Central European Time: 6.00 pm**

**Corresponding Eastern Time: 12.00 pm/Noon**

Webinar via Zoom Webinars, registered participants will receive link for meeting.

**Chairs:** Christian von Wagner, Expert Working Group Co-Chair  
Peter Liang, Expert Working Group Co-Chair

**Session title:** Lessons from studies into understanding attendance at colonoscopy in colorectal screening: “Everything you always wanted to know about colonoscopy but were too afraid to ask. “

**Overview:** This session will cover a truly international panel of experts who have converged on the longstanding issue of colonoscopy attendance. We will look at this through the lens of both colonoscopy as the primary modality and as the follow up test after an abnormal Faecal immunochemical test. The webinar will cover lessons from both organised and opportunistic programmes and will include studies into a wide range of barriers. This will include some very recent work into the impact of COVID-19 and offering colonoscopy to people requiring follow up in the English Screening programmes. Finally, we will conclude by looking at approaches to improve attendance at follow up colonoscopy.

---

5.00 pm	Welcome by Expert Working Group Co-Chairs	<i>Christian von Wagner (UK) and Peter Liang (USA)</i>
5.05 pm	Disgusted, Embarrassed, Afraid: Affective predictors of colonoscopy avoidance.	<i>Lynne Klasko-Foster, Brown University, USA</i>
5.25 pm	Barriers and facilitators to colonoscopy: A rapid review and thematic synthesis of the qualitative literature	<i>Rob Kerrison, UCL, UK</i>
5.45 pm	No colonoscopy after a positive FIT in the Dutch colorectal cancer screening programme: a national cross-sectional questionnaire study	<i>Lucinda Bertels, Amsterdam UMC, University of Amsterdam, NL</i>
6.05 pm	<b>BREAK (5 minutes)</b>	
6.10 pm	Covid-19 and follow up of patients with abnormal FIT	<i>Andrew Prentice, St Mark's Hospital, London, UK</i>

6.30 pm The impact of hypothetical Personalised Risk Information on informed choice and intention to undergo Colorectal Cancer screening colonoscopy in Scotland (PERICCS).

*Jayne Digby,  
NHS Tayside, UK*

6.50 pm Interventions to improve the follow-up of positive FIT: an international survey of screening programs

*Kevin Selby,  
Unisanté, CH*

7.10 pm Discussion

7.40 pm **Meeting adjourns**
